<b>REMARKS</b>	Cyclone "Ciril" will produce a large amount of rain and a very strong - stormy south wind, waves are expected along the coast. The warm south wind can cause intense melting of snow in the mountains, currently, at 1500m the snow cover is about 60-70cm. Flash Floods in urban areas and torrents are potentially possible, as well as thunderstorms and strong wind damage. Large amounts of rain are expected in the central and southern-southwest parts of Montenegro, around 100-300mm in southwest parts around 300mm (ECMWF forecast), and strong wind gusts in the northern mountainous part and on the sea coast, with the intensity at least around 9-10 B.
